### Hydropolitics Water Policy And Conflict

The course takes a broad view of what “water conflict” means, and includes discussion of attempts to deal with inter-sectoral competition, international allocation treaties, the diplomatic and economic consequences of unilateral infrastructure construction, local communities competing for resources in a changing climate, and water scarcity as component of violent conflict and human migration.

### Hydropolitics: Water Policy and Conflict

Fall 2019. Water resources are increasingly contested in nearly all parts of the world. Available freshwater supplies have declined nearly 40% since 1970, and the UN predicts that, by 2025, 1.8 billion people will not have sufficient water to meet all of their daily needs. Water conflict is essentially a political problem because it reflects normative disagreements about who has the authority to define its value and appropriate uses.

### Hydropolitics: Water Policy and Conflict

On Wednesday, February 20, 2019, the Strauss Center welcomed Scott Moore, the Director of the Penn Global China Program at the University of Pennsylvania, for a talk on “Hydropolitics in China: Water Conflict, Development, and Sustainability in a Rising Power.”. Drawing on new book, Subnational Hydropolitics, this talk explored the role that water has played in Chinese politics, its rapid economic growth, and its struggle to make its development sustainable.

### Hydropolitics in China: Water Conflict, Development, and ...

Water politics, sometimes called hydropolitics, is politics affected by the availability of water and water resources, a necessity for all life forms and human development. Arun P. Elhance's definition of hydropolitics is "the systematic study of conflict and cooperation between states over water

resources that transcend international borders".
